HANDOUT 3C-1

Fact or Falsehood?

- | | |
|-----|--|
| T F | 1. People everywhere return favors. |
| T F | 2. The DNA in chimpanzees is 99.4 percent the same as that in humans. |
| T F | 3. Even complex human traits are determined by a single gene. |
| T F | 4. Fraternal twins are genetically no more similar than ordinary brothers and sisters. |
| T F | 5. Adoptees' traits such as extraversion and agreeableness bear more similarities to their adoptive parents than to their biological parents. |
| T F | 6. Child neglect and abuse and even parental divorce are rare in adoptive homes. |
| T F | 7. Eating disorders are primarily a contemporary Western cultural phenomenon. |
| T F | 8. If after a worldwide catastrophe only Icelanders or Kenyans survived, the human species would suffer a huge reduction in its genetic diversity. |
| T F | 9. Men judge women as more attractive if they have a youthful appearance, and women prefer men who are mature, dominant, and affluent. |
| T F | 10. A culture with gender equality is a culture with larger gender differences in mate preferences. |
